# Correction to: Cut-off points between pain intensities of the postoperative pain using receiver operating characteristic (ROC) curves

Sooyoung Cho<sup>1</sup>, Youn Jin Kim<sup>1\*</sup>, Minjin Lee<sup>2</sup>, Jae Hee Woo<sup>1</sup> and Hyun Jung Lee<sup>1</sup>

## Correction to: *BMC Anesthesiol* 21, 29 (2021) <https://doi.org/10.1186/s12871-021-01245-5>

Following publication of the original article [1], the authors report an error in the Method section. The formula used for determining the cut-off points from the receiver operating characteristic (ROC) curves was published incorrectly, so the authors correct the error. The formula was published as below originally.

$$d = \sqrt{(1 - \text{sensitivity})^2 + (1 - \text{specificity})^2}$$

The authors correct this as below [2].

$$d = \sqrt{(1 - \text{sensitivity})^2 + (1 - \text{specificity})^2}$$
